

Dear Nicolas,

Thank you for your letter. It was wonderful to hear about all your hobbies. Hobbies are so important and enable us to meet all kinds of people. I like dancing, reading and drawing. I am a bit too old now for dancing, but it keeps me fit and my worries disappear when I am dancing. I also love peanut butter. I always have a jar of it in my cupboard, but do you know, I have never tried it with jam. I am going to try it for lunch today based on your recommendation!

Wow, your family can speak many languages, that is impressive. That is a regret of mine that I didn't learn to speak French properly despite learning it at school. I should have practised more.

You sound like a very kind boy. It was lovely to hear about your love for animals and your passion really comes across in your letter. It is so important that your generation look after our amazing planet and all the animals too. Whatever you end up doing in life, reach for the stars, follow your dreams and make sure you do what you are passionate about.

Have you done any research into stars? I believe there are many different types of stars, so I don't have a favourite. There is so much we don't know about the universe. I like to think of us all as individual stars. What type of star are you?

Best Wishes

Linda
